Town Clerk/Manager advised council of a Community Water Improvement & Consultant

engaged Stantec Consulting to provide communities with access to technical expertise
for drinking water issues. The project will be focusing on small public water systems
serving populations of 500 or less. The goal is to engage with community staff and
water system operators to gain understanding of the causes of water system challenges
while providing mentorship to identify and implement corrective measures. This is
offered at no cost to the Town as long as they are active participants in the project.
Limited communities will be selected. Council expressed concern that this project would
replace the current water system operator currently in place with the town, but would
like more information. Town Clerk/Manager has expressed interest in participating in the
program but is awaiting further information from the Water Resource Management
Division.
